Electricity Price (Residential)	This price disclosure is based on the average usage levels above with an estimated 42% consumption during Night Hours. For example, we have assumed at the 1000 kWh average price calculation above that 420 kWh of usage (42% of the total 1000 kWh in the month) are consumed during the Night Hours. **Night Hours = 9:00 PM – 7:00 AM. Your bill will contain a credit for Energy Charges resulting from energy consumed during Night Hours.** • Energy Charge: 13.1¢/kWh. • Pass-Through TDSP Distribution Charge: 6.8673¢/kWh. • Pass-Through TDSP Customer and Meter Charge: $4.06 per month. • Base Charge of $4.95 per ESI-ID will apply each billing cycle. Your average price for electric service will vary according to your monthly usage. The average price per kWh does not include a JustGreen charge. The price does not include federal, state, or local sales taxes or fees, reimbursement for the state miscellaneous gross receipts tax, other government charges, or all other non-recurring fees. Some locations may be subject to a TDSP Underground Facilities and Cost Recovery Charge authorized by their city that is not included in the total average price shown. For more details, see the TDSP service tariff for a listing of cities and authorized charges. **The credit for energy consumed during Night Hours is determined using interval usage data from your advanced meter, as provided by the TDSP. You may not receive credits for some Night Hours if the utility does not provide interval data at the time your bill is generated or if that usage is not billed. The credit may also not apply during billing periods with partial consumption billed under the terms of this contract due to the contract's effective dates.** **Customers with distributed generation may not be eligible for this product, please refer to the Terms of Service statement for more details.** A Minimum Usage Fee of $4.99 will apply to billing cycles less than 400 kWh.
